

## Hovering around

Friday, 26 February 2010 13:23

---

This young man was one of several students who showed off their homemade hovercraft Thursday evening prior to the USD 480 Science Fair awards ceremony. The students use an electric or battery-powered leaf blower to power their hovercrafts. Forward motion is provided by a running push from a friend. A list of the winners from USD 480 will be in Sunday's edition. Daily Leader photo/Robert Pierce
