Routine blood test saved baby's life

MCADD a silent killer for many

A 14-year-old boy, who looks like the stereotypical healthy kid, died last month because his parents, Colleen and Morgan, didn't know that only hours after his birth, he was a perfect candidate for death.

After his mother learned he had MCADD, she was able to get him the treatment he needed to survive. The boy, who is now 14, is still alive and well.

Colleen and Morgan had a son, who was born with MCADD. They didn't know it until he was 14 years old. They were told that he had MCADD when he was 14 years old. They were told that he had MCADD when he was 14 years old.

Colleen and Morgan had a son, who was born with MCADD. They didn't know it until he was 14 years old. They were told that he had MCADD when he was 14 years old.
