Who needs Bluetooth headsets? Motorola patents 'neck tattoo' smartphone accessory
A person's neck could be used as a wireless communication device, according to a new patent filed by Motorola. The patent, titled "Neck tattoo," describes a device that can be attached to a person's neck and used to communicate with a smartphone. The device would use a small antenna to transmit and receive signals, and would be powered by a small battery. The patent also describes a method for using the device to control a smartphone. The device would be used to control the smartphone by touching the person's neck. The patent is a significant development in the field of wearable devices, and could lead to a new class of mobile devices.

Company behind Obamacare site has checked past
The company behind the Obamacare website has a history of legal problems, according to a report. The report, published by the Wall Street Journal, says that the company, VeriSign, has been sued multiple times for copyright infringement and trademark violation. The report also says that VeriSign has a history of using deceptive marketing tactics. The report is a significant development in the ongoing debate about the Obamacare website, and could lead to a new class of mobile devices.

DC official fired after criticizing Obama change
A senior official at the Department of Justice has been fired for criticizing a change to the Obama administration's policy on the use of drones. The official, John R. Bolton, was fired after he wrote a memo in which he criticized the administration's policy. The memo said that the administration's policy was "unlawful and unconstitutional." The firing is a significant development in the ongoing debate about the use of drones, and could lead to a new class of mobile devices.

Health Insurance Marketplace: Please Wait!
The Health Insurance Marketplace is set to launch in 2014, but there are several issues that need to be resolved before it can be implemented. These issues include the need for a more robust regulatory framework, the need for a more robust consumer protection framework, and the need for a more robust data security framework. The issues are significant, and need to be resolved before the Marketplace can be implemented.

CHRISTMAS PARADE
The Christmas parade is a tradition that has been celebrated for many years. It is a time when people come out to watch the parade and enjoy the festive atmosphere. The parade is a significant event in the community, and is a time when people come together to celebrate the holiday season.
