She was a member of the Oklahoma State Fair and the Oklahoma State Fair.

She is shown here in 1911 at the Oklahoma State Fair. She is shown here in 1911 at the Oklahoma State Fair. She is shown here in 1911 at the Oklahoma State Fair.

### Home electricity use in US falling to 2001 levels

Home electricity use in the United States has fallen to levels not seen since 2001, according to a report from the U.S. Energy Information Administration (EIA). The report shows that total electricity consumption in U.S. homes fell by about 10 percent from 2009 to 2012. This is the first time since 2001 that home electricity use has declined. The report also shows that electricity use in homes has increased by about 10 percent since 2001. This is due to a combination of factors, including the widespread use of energy-efficient appliances and the growing use of energy-efficient lighting.

**BETTER HOPE**  
A group of researchers from the University of California, San Diego, have developed a new method for detecting and identifying diseases. The researchers used a machine learning algorithm to analyze medical records and identify patterns in the data. The algorithm was able to detect and identify diseases with a high degree of accuracy. This is a significant breakthrough in the field of medical diagnosis.

**BETTER GADGETS**  
A new line of smart home devices has been introduced. These devices are designed to make life easier and more convenient. They include smart thermostats, smart light bulbs, and smart security cameras. These devices can be controlled remotely using a smartphone or tablet. They can also be integrated with other smart home devices to create a fully automated home.

**ON THE OTHER HAND...**  
A new study has found that people who use smart home devices are more likely to be satisfied with their homes. The study found that people who use smart home devices are more likely to report higher levels of satisfaction with their homes. This is likely due to the convenience and control that these devices provide. The study also found that people who use smart home devices are more likely to be environmentally conscious.
