Oklahoma City resident celebrates 113th birthday

Ms. Rebecca Howell, 113, in her 21st birthday. Rebecca Howell, 113, is celebrating her 113th birthday on Monday, Jan. 1, 2014.

Rebecca Howell, 113, is celebrating her 113th birthday on Monday, Jan. 1, 2014. She was born on Jan. 1, 1901, in Okmulgee, Okla. She is the oldest living person in Oklahoma City. She has been married to her husband, William, for 75 years. They have six children and 14 grandchildren. She is a member of the First Baptist Church in Okmulgee. She is also a member of the Oklahoma State Historical Society. She has been in the nursing home since she was 90 years old.

Home electricity use in US falling to 2001 levels

Home electricity use in the United States is falling to levels last seen in 2001, according to a report from the U.S. Energy Information Administration (EIA). The report shows that residential electricity consumption in the U.S. fell 1.1 percent in 2012, to 1,425.5 billion kilowatt-hours. This is the first time since 2001 that residential electricity use has declined. The EIA says that the decline is due to a combination of factors, including more energy-efficient appliances and buildings, and a shift away from electricity to natural gas for heating and cooling.

BETTER GADGETS
The U.S. Energy Information Administration (EIA) reports that home electricity use in the U.S. is falling to levels last seen in 2001. This is due to more energy-efficient appliances and buildings, and a shift away from electricity to natural gas for heating and cooling.

BETTER HOPES
The U.S. Energy Information Administration (EIA) reports that home electricity use in the U.S. is falling to levels last seen in 2001. This is due to more energy-efficient appliances and buildings, and a shift away from electricity to natural gas for heating and cooling.

ON THE OTHER HAND...
The U.S. Energy Information Administration (EIA) reports that home electricity use in the U.S. is falling to levels last seen in 2001. This is due to more energy-efficient appliances and buildings, and a shift away from electricity to natural gas for heating and cooling.
