LYP endorses bond proposal

The Liberal Party of Ontario has endorsed a \$1.5-billion bond proposal for the province's infrastructure. The bond is intended to fund a wide range of projects, including roads, bridges, and public transit. The proposal was introduced by the Ontario government and is expected to be approved by the provincial legislature in the coming weeks.

Feds list lesser prairie chicken as threatened

The U.S. Fish and Wildlife Service has listed the lesser prairie chicken as a threatened species. The bird, which is native to the Great Plains region of the United States, has seen a significant decline in its population over the past several decades. The listing is the result of a petition filed by conservation groups and is expected to lead to increased protection for the species.

This March 2014 photo provided by the Texas Parks and Wildlife Department shows a male lesser prairie chicken in its natural habitat. The bird is characterized by its mottled brown and tan feathers, a long, thin beak, and a distinctive crest of feathers on its head. It is shown standing on a grassy field with a blurred background of trees and a bright sky.
